

## The AIDS song by Jony Jerusalem

- Use the words in the box to complete the song:

|      |        |         |          |      |        |       |
|------|--------|---------|----------|------|--------|-------|
| TIME | STIGMA | PEOPLE  | WORSE    | AIDS | HOUSES | KNIFE |
|      | BLOOD  | PATIENT | INSIDE   |      |        |       |
|      |        | VIRUS   | REMEMBER |      |        |       |
|      | HEART  | FRIEND  | ONE      |      |        |       |

No ..... is to blame because I'm just the same

As the ..... you meet when you walk down the street

We all have a purpose, a life to fulfill

Though some may be healthy and some may be ill

The trouble that hides in me couldn't be .....

The illness inside me is more like a curse

For I have a ..... and ..... is its name

But don't turn away from me, I'm not to blame

There are viruses, illnesses, cancers, disease

That can wrestle the strongest of ..... to his knees

But of all the diseases that cut short one's life

Only AIDS has a stigma that cuts like a .....

No, don't turn away from him, don't try to hide

From the ..... who suffers this sickness inside

No, don't turn away for the sake of a name

For you know, deep ....., we are all just the same

And always ..... that though this is true

It doesn't make me less a person than you

So try to be loving and don't criticise

Though the ..... may burn in society's eyes

Yes, the virus may be in the ..... in my veins

But I'm just like you, we're all just the same

I'm still the same person I was yesterday

So next ..... you see me, please don't turn away

Remember there's no one this virus ignores

Though you've locked up your ..... and bolted the doors

Remember the powerful key that you hold

That opens the ..... and brings hope to the soul

No, don't turn away, be a ....., understand

No matter what happens a man's still a man

And I call from the heart that beats deep in my breast

Be loving and ..... and look for the best
